## SKILLS

Backend Skills:

- Java • Java Servlets • Spring MVC
- Spring Boot • SQL

Frontend Skills:

- HTML • CSS • Bootstrap
- JavaScript

Familiar:

- Hibernate • C++

Other:

- Data Structures • Algorithms

## CERTIFICATION

Udemy: Basics of data structures

algorithms using C and C++

Microsoft: Azure Fundamentals

Udemy: Oracle SQL

Udemy: JSP, Servlets and JDBC

## COURSEWORK

### UNDERGRADUATE

Computer Networks

Operating Systems

Computer Graphics

Data Structures

Microprocessor

Software Engineering

## EXPERIENCE

### EXPLEO SOLUTION LIMITED | SENIOR SOFTWARE ENGINEER

Aug 2023 – Present | Mumbai, India

ENVIRONMENT: JSP, SERVLETS, ORACLE SQL, PL/SQL, HTML, CSS, JIRA

- Developed and successfully delivered several key features on schedule, enhancing the overall user experience and satisfaction.
- Implemented dependency injection and inversion of control (IoC) using Spring's container.
- Enhanced application security, resulting in safeguarded sensitive user information and compliance with industry regulations
- Participated in the full software development life cycle, including requirements gathering, design, coding, testing, debugging, and deployment.
- Customized Spring applications using XML configuration and Java-based configuration, enabling easier configuration updates and future enhancements.
- Implemented unit tests that reduced the number of bugs and defects in production, resulting in higher customer satisfaction and improved overall system quality.

### STOCKHOLDING CORPORATION OF INDIA LTD | SOFTWARE ENGINEERING

Sep 2021 – Aug 2023 | Mumbai, India

ENVIRONMENT: JSP, SPRING MVC, SPRING CORE, ORACLE SQL, PL/SQL, HTML, CSS

- Implemented server side programs using servlets and JSP.
- Created some common stored procedures that saved time in fetching the data.
- Implementing authentication of users in 2 products using OTP.
- Participated in the full software development lifecycle, including requirements gathering, design, coding, testing, debugging, and deployment.
- Covered majority testing of products using jQuery based code while development of applications.
- Troubleshooted and resolved technical issues, bugs, and performance bottlenecks in production environments.
- Conducted code reviews to ensure code quality, maintainability, and adherence to coding standards.
